

CAN YOU SEE ME NOW?

Avoid Distractions.   

 Watch for pedestrians and bicyclists – especially at night.

 Wear bright colored clothing or reflective gear.

 Always use bike lights at night.

SAFETY DOESN'T HAPPEN BY ACCIDENT

www.AlertTodayFlorida.com

PEDESTRIANS

- Be visible. Walk in well-lit areas.
- Wear bright or reflective clothing. Be seen. Be safe.
- Assume drivers do not see you.
- Use a crosswalk. Push the button to activate the walk signal.
- Look left, right and left again before crossing the street.

BICYCLISTS

- Turn on your front white light and red taillight at night. Rear red reflectors are also required.
- Stay visible. Choose well-lit bicycle routes.
- Always wear a helmet, the brighter the color the better.
- Bicycles on the road are vehicles. Obey all traffic signs, signals, and lane markings.
- Yield to traffic when appropriate. It's better to be safe than "to be right."

MOTORISTS

- Be alert! At night, pedestrians and bicyclists are not easily seen.
- Avoid distractions while driving; focus on the road.
- Always stop on red and watch out for pedestrians before making a right turn.
- Bicycles are legal vehicles; move over when passing.
- Slow down! Speed is a major cause of fatal crashes.
